EDUCATION

National Institute of Technology Karnataka **Nov 2022 – May 2026**
Bachelor of Technology in Computer Science and engineering *CGPA - 7.1*

Sri Sapthagiri Pre-University College Tumakuru **May 2022**
XII State Board *Percentage-80%*

EXPERIENCE

Capgemini **May 2025 – July 2025**
Digital Intelligence Framework (DIF) *Bengaluru, Karnataka*

- Developed AI-powered automation modules for the **Digital Intelligence Framework (DIF)** using **Python**, **Machine Learning**, and **Natural Language Processing (NLP)** to streamline enterprise workflows, reducing manual intervention and improving operational efficiency.
- Integrated **real-time task execution**, activity logging, and performance monitoring mechanisms, improving system reliability, traceability, and execution efficiency while supporting scalable AI-driven automation.

Krutanic Solutions **July 2026 – Present**
Business Development Associate *Bengaluru, Karnataka*

- Utilized **CRM platforms** to manage customer data, track sales pipelines, and maintain data accuracy while analyzing lead metrics to support business decisions and improve operational efficiency.
- Collaborated with **cross-functional teams** to identify process improvements, troubleshoot CRM-related issues, automate routine workflows, and streamline customer onboarding through effective use of digital tools.

PROJECTS

AspectWise | *Python, Kaggle, NLP* **Mar 2023 – Aug 2023**

- Developed a comprehensive Targeted Aspect-Based Sentiment Analysis (TABSA) system using Python, TensorFlow, and **DistilBERT**, achieving **98%** accuracy in sentiment extraction from customer reviews.
- Implemented a **recommendation system** leveraging extracted sentiment data to provide personalized product suggestions, enhancing user experience and satisfaction
- Created and deployed a user-friendly frontend with **ReactJS** and **Flask**, and a live demo with Streamlit, allowing real-time sentiment analysis and product recommendations.

Gesture-Based Rover | *Python, TensorFlow, OpenCV* **Jan 2024 – Mar 2024**

- Developed and implemented Gesture Based Rover using fine-tuned **VGG16** for image classification, achieving 99.61% accuracy.
- Utilized **Arduino** and **ESP32** for hardware interface and wireless communication, enabling seamless interaction between the system and the rover.
- Integrated Otsu automatic thresholding for precise **image binarization** and live webcam streaming for real-time gesture detection.

AgriVerify | *Solidity, ReactJS, Metamask* **Oct 2024 – Nov 2024**

- Developed a decentralized platform for **organic crop certification** using **Solidity smart contracts** and **Web3.js**, ensuring blockchain-based transparency.
- Implemented **Metamask onboarding** and **QR code generation** for farmers to authenticate and verify certified produce.
- Integrated **Push Protocol** for real-time crop certification alerts, enhancing farmer engagement and platform responsiveness.

TECHNICAL SKILLS

Languages Frameworks: C++, Python, C, SQL, Django , Terraform.
Tools Technologies: Apache Spark, Azure , GCP ,Git, GitHub, Jupyter Notebook, VS Code, Intellij IDE, REST APIs.
Coursework:DSA, OS, DBMS, DMS, Blockchain, Cloudcomputing, TOC, AI.

EXTRACURRICULAR ACTIVITIES

Career Development Centre (CDC) **July 2025 – Present**
Placement Coordinator *NITK*

- Managed technical hiring workflows by organizing candidate databases, coordinating interview pipelines, and ensuring seamless execution of recruitment drives.

ACHIEVEMENTS

- Cleared the **Regional Science and Mathematics Olympiad**, demonstrating strong conceptual understanding and analytical aptitude in science.
